Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The status of the division application should be updated as it is now U.S. Patent No. 6,409,977.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 3-9 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. While the originally filed specification provides support for a loading device and the positioning of such on a multi-tube reactor, the specification as originally filed does not describe the subject matter directed toward positioning a plurality of loading devices or having a plurality of loading devices positioned on a multi-tube reactor.
4. Claims 4-9 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a loading device having a polygonal shape, does not reasonably provide enablement for any shape. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly

connected, to make or use the invention commensurate in scope with these claims.

The specification only, and specifically, describes the plates of the loading device as polygonal and does not provide support the more general term "shape" would could also comprise non-polygonal shapes such as ovals or circles.

Allowable Subject Matter

5. Claims 3 and 4 are allowed.

6. The following is an examiner's statement of reasons for allowance: The prior art neither teaches nor suggests a method of loading solid particles into a multi-tube reactor using a loading device, as claimed, wherein each plate is displaced from adjacent plates by spacing having a width not greater than the smallest dimension of a single particle to be loaded wherein said spacing functions to collect dust and partial particles.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art made of record only serves to demonstrate the state of the art.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alexa A. Doroshenk whose telephone number is 571-
